ABOUT US

Leko Style has been operating in the F&F and cosmetics ingredients market since 2000.

Together with the leading Food, Cosmetics and Pharmaceuticals producers, we have successfully passed the most significant stages of market growth and development.

Leko Style is a member of The International Federation of Essential Oils and Aroma Trades (IFEAT) and of St.-Petersburg Chamber of Commerce.

Leko Style

OUR TEAM

Leko Style is a team of talented, energetic and reliable people, building a better today and tomorrow.

The team of efficient experts devoted to their job is the uttermost company value. We enable employees to reach their full potential by providing support and encouraging initiative, creating comfortable environment and team spirit.

QUALITY CONTROL AND CERTIFICATION

We thoroughly examine the quality of all incoming raw materials. Quality control is assured at each stage, from pre-contract sample approval to shipment from the company warehouse.

Company sales managers advise our clients on the properties and usage of the all products we offer.

Certification specialists monitor changes in legislative regulations and obtain all required certificates to confirm quality and safety of our products.

PURCHASING POLICY

We purchase raw materials from large-scale international companies as well as from small private manufacturers, who specialize in a limited number of products. We maintain a wide range of suppliers to ensure best prices and continuous delivery.

COSMETICS AND HOUSEHOLD PRODUCTS INGREDIENTS

Ingredient	Application in Cosmetics
■ D-Pantenol	■ Biologically active agent; stimulates regeneration of skin and mucous tissues; normalizes cellular metabolism; accelerates mitosis; strengthens collagen fiber; produces regenerating, metabolic and antiseptic effect.
■ Alpha-lipoic acid	■ Biologically active agent; bactericidal to Propionibacterium acnes and Staphylococcus epidermidis; reduces acne causing fat acids; eliminates comedones; ensures anti-blackhead depigmentizing effect.
■ Azelaic acid	■ Biologically active agent; produces anti-inflammatory and anti-bacterial effect; soothes and smoothes skin.
■ Bisabolol	■ Biologically active agent; very powerful and multi-purpose antioxidant; regulates lipid and carbohydrate metabolism; removes cell toxins; minimizes skin pores; enhances Q10 coenzyme and vitamins.
■ Caffeine	■ Biologically active agent; improves and stimulates skin; reduces visible cellulites and eye bags; enhances antioxidants; produces anti-inflammatory effect.
■ Plant Extracts	■ Used in cosmetics as biologically active additives; provide antioxidant, energizing, anti-swelling and anti-inflammatory effect and capillary protection.
■ Fatty oils (for complete list go to page 18)	■ Used in cosmetics as both biologically active component and excipient; prevent skin dehydration, soothe and nourish it; provide anti-inflammatory, regenerating and stimulating effect.
■ Essential oils (for complete list go to page 21)	■ Used in cosmetics as both biologically active components and excipient; demonstrate diverse biological activity: anti-bacterial, anti-inflammatory, soothing and regenerating.
■ Fragrances	■ go to page 12.

AROMACHEMICALS FOR COSMETICS

Name	Odor description	Application in Cosmetics
Benzyl Alcohol	faint, with light almond tingle	Preservative; flavor and fragrance ingredient.
Benzyl Benzoate	very faint, balsamic	Solvent and fixative in perfumery, also used as a softener in nail polish.
Benzyl Acetate	strong, floral (jasmine) with light fruit tingle	Preservative (complete preserving with 0.2%); flavor and fragrance ingredient.
Citral	strong citric	Preservative (complete preserving with 0.2%); flavor and fragrance ingredient.
Citronellol	fresh, floral (rose, geranium)	Fragrance and flavor component used in cosmetics, household chemicals and food industry. Biologically safe repellent.
D-Limonene	citrus, fresh, sweet	Natural solvent in cosmetics and household chemicals; proved to be a good insecticide.
Eugenol	(strong, spicy clove	Fragrance and flavor component used in cosmetics, household chemicals and food industry.
Geraniol	flower, herbal fruity, roses, balsamic notes; steady scent	Fragrance and flavor component used in cosmetics, household chemicals and food industry.
Alpha-Ionone	Floral (violet), woody with a fruit tingle	Preservative (complete preserving with 0.3%).
Linalool	strong floral with a woody, citrus, rose-tree note	Fragrance and flavor component used in cosmetics, household chemicals and food industry.
Menthol	menthol, peppermint, cooling, woody	Mild antiseptic; great refreshing agent in dental products; as a skin remedy has analgesic, refreshing and cooling properties.
Thymol	Spicy, with "medicinal" trace, Notes of phenol, camphor, thyme	Similar to carbolic acid, but has a weaker and more delicate effect; good disinfectant, analgesic, used in dental and burn remedies; in combination with camphor and ethanol contracts pores; dental products, creams, lotions ingredient.
Phenyl Ethyl Alcohol	Smooth, floral (rose)	Preservative (complete preserving with 0.2%); fragrance and flavor ingredient.
Alpha-Pinene	Resinous, coniferous	Solvent in household chemicals; antiseptic; fragrance and flavor ingredient.
Methyl antranilate	fruity with a phenol note; neroli note when diluted	Biologically active agent; used in tanning oils, about 0.5-0.75%; fragrance and flavor ingredient.

READY-TO-USE COSMETIC PRODUCTS: EXFOLIANTS

We supply exfoliants from stock or by a client recipe. The customer's formula can be improved by our supplier's experienced cosmetologists.

■ *Ready-made exfoliants are shipped directly from the manufacturer (UK).*

Color, flavor and scent are up to the Client

Exfoliant Constructor

Bases:

- salt based
- sugar based
- various abrasive particles based

Application:

- lips (various flavors)
- face
- hands
- body
- feet

Types of exfoliants:

- solid bar
- viscous
- gel based

Additional features:

- moisturizing
- cooling
- anti-inflammatory
- strong flaking-off
- anti-cellulitis
- various skin types
- optional preservatives
- foaming.

READY-TO-USE COSMETIC PRODUCTS: HYDROLATS

- This purely natural product combines freshness of clean water with healing effect and aroma of essential oils.

We offer hydrolats in original packing directly from manufacturers in Spain and Bulgaria during oil production season. This ensures the longest possible shelf life and excellent product quality.

Rose and Lavender Waters, Bulgaria - July-August

Hydrolates, Spain

Anise - October-November

Spanish Oregano - June

Hyssop - June-September

Cypress - all the year

Spike Lavender (*Lavandula latifolia*) - August

Lavender (*Lavandula angustifolia*) - August

Lavandin - August

Cistus - September-December

Marjoram - June-July

Lemon Petitgrain - September-October

Rosemary - all the year

Santolina - July

Thyme Linalool type - July-August

Thyme Red - June

Fennel - August-September

Spanish Sage - August

Dalmatian Sage - July

Eucalyptus - all the year

FOOD INGREDIENTS

Taste and Flavor Creation

Food Additives:

- Vanillin
- Ethyl Vanillin
- Maltol
- Ethyl Maltol
- Benzyl Alcohol, etc.

Waxes:

- Carnauba Wax
- Candelilla Wax
- Bees Wax

Essential Oils:

- citrus oils
- spicy oils
- mint oils

Oleoresins:

- Black Pepper
- Garlic
- Fenugreek, etc.

VEGETABLE OILS AND BUTTERS

Vegetable oils and butters are produced from fruits and seeds by pressing and extraction. Crude oils might then undergo different kinds of processing: refining, whitening, hydrogenation, deodorization. Each stage of processing moves the product on the scale from the maximum content of nutrients to the maximum stability in the final product.

go to ***www.lekostyle.com*** for complete information

Over 40 products are in regular stock

Our company offers a great variety of vegetable oils and butters ranging both by name and/or by processing.

Rare and exotic oils are available by order.

VEGETABLE OILS AND BUTTERS

Name	Type	Plant of origin	Country of origin
Andiroba Oil	partly refined, deodorised	Carapa Guaianensis Seed Oil	Brasil
Apricot Kernel Oil	refined	Prunus Armeniaca	Italy, France
Virgin Argan Oil	pressed, unrefined	Argania spinosa L. Skeel, Sapotaceae family	Maroco
Avocado Butter	refined	Hydrogenated Persea gratissima	South Africa
Avocado Oil	refined	Persea Gratissima	South Africa
Babassu Oil	refined, organic	Orbignya oleiferab	Brasil

ABSOLUTES, CONCRETES, RESINS, EXTRACTS, BALMS

We offer both the traditional absolutes, such as Rose and Jasmine, and the more rare ones (e.g. Honey absolute) that are supplied by order. Such traditional perfumery ingredients as Styrax absolute and Oakmoss resinoid are always in stock.

Other products available are Vanilla and Coffee extracts, Peru Balm, and many more.
